MDB-COMPACT

CENTRAL FILTER SYSTEM WITH INTEGRATED FAN

The MultiDust Bank (MDB) COMPACT is a compact filter unit with integrated fan, filter cleaning system and dust drawer for connection to an external device, e.g. a welding robot or a cutting table. The fan is placed in a sound absorbing box.

The unit is controlled by a separate control panel (FilterControl), which is included in the package.

Image: MDB-4/COMPACT

APPLICATIONS

The MDB-COMPACT is intended to be used for the following applications:

- MIG-MAG/GMAW welding
- TIG welding
- FCAW welding
- stick/MMAW welding

Combined with an OilShield (limestone feeder) the MDB-COMPACT is also suitable for:

- oil mist
- heavy oil mist in welding fume

SPECIFICATIONS

■ Physical dimensions and properties			
Material (housing): • steel grade • steel grade no.	electro-zinc coated steel (according to DIN EN 10152) • DC01+ZE • 1.0330		
Colour: • front and back • sides and top	• black RAL 9005 • grey RAL 7035		
Dimensions FilterControl panel	400 x 300 x 152 mm (15.7 x 11.8 x 6.0 in.)		

■ Filter cartridges

Filter cartridges are not included and must be selected and ordered separately. For more details: refer to the separate data sheet.

Filter material:				
• 100% BiCo polyester				
• 100% Bico polyester with aluminium coating (antistatic)				
 PTFE impregnated BiCo polyester 				
• 100% BiCo polyester with PTFE membrane				
• 80/20 cellulose/spunbond polyester fibre with polyester nanofibre overlay				
■ Fan				
radial				
IEC				
by PTC thermistor				

Efficiency level	IE3			
Motor speed	max. 3500 rpm			
■ Compressed air system	m			
Required compressed air quality	dry and oil-free according to ISO 8573-3 class 6			
Required pressure	4-5 bar (60-75 PSI)			
Compressed air connection	8 mm push-in fitting			
Activation of filter cleaning	pressure controlled			
Filter cleaning cycles	 offline at 800/1000/1200 Pa (3.2/4/4.8 in. WG) online at 1500 Pa (6 in. WG) forced after 30 running hours <800 Pa (3.1 in. WG) 			
■ Electrical data				
Connection voltage of fan	230V/3ph/60Hz*460V/3ph/60Hz575V/3ph/60Hz			
* The compact design of the unit, in combination with a high air performance, is achieved by using 60 Hz fan technology. For this reason it is necessary to install a variable frequency inverter (VFD) for 50 Hz power grids (e.g. in Europe). For 60 Hz power grids a frequency inverter is optional.				
Connection voltage for control equipment	100-240V AC single phase 50-60Hz			
Activation of start/stop device	by 0-24 VDC signal			
Ambient conditions				
Process temperature: min. nom. max.	• 5°C (41°F) • 20°C (68°F) • 70°C (158°F)			
Max. relative humidity	80% (non-condensing)			
Outdoor use allowed	no			
Storage conditions	• 5-45°C (41-113°F) • relative humidity max. 80%			
■ Product combinations				
SHIELD fire safety solutions (prevention): • SparkShield • OilShield	cyclonic spark arrester limestone feeder			

Combination with SHIELD fire detection and suppression

products is not possible.

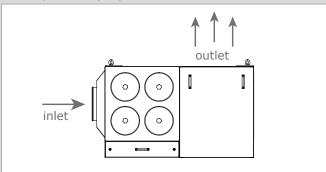

Options and accessories				
Compressed air regulator	CAR-KIT			
Compressed air sensor (kit)				
Precoat material (for filter cartridges CART-D, CART-C and CART-E)	PRECO-N			
Adapter	• from Ø 250 mm to Ø 10 in. • from Ø 400 mm to Ø 16 in.			
An adapter from Ø 355 mm to 14 in. is not necessary.				
Frequency inverter	 VFD-2.2 (2,2 kW / 3 HP) VFD-4 (4 kW / 5 HP) VFD-5.5 (5,5 kW / 7.5 HP) VFD-11 (11 kW / 15 HP) 			
Refer to Table 1 for selection	on of frequency inverter.			
■ Scope of supply				
Fan-filter unit (pre-assembled) - Mounting hardware - FilterControl panel				
Not included: Filter cartridges - Frequency inverter				
■ Order information				
Number/package	1			
■ Shipping data				
Harmonized Tariff Code	8421.3920.90			
Country of origin	Netherlands

AIRFLOW DIRECTION

FEATURES

SilentFlow™ sound absorbing box along with innovative air flow path reduce both mechanical and airflow noise of the fan.

Lockable high-capacity dust drawer with pull-out protection.

Efficient filtration of dust and welding fume.

The effective RamAir™ pulse amplifier: individually cleaning of the filter cartridges by compressed air pulses.

Separate FilterControl panel with system status indicators and control buttons.

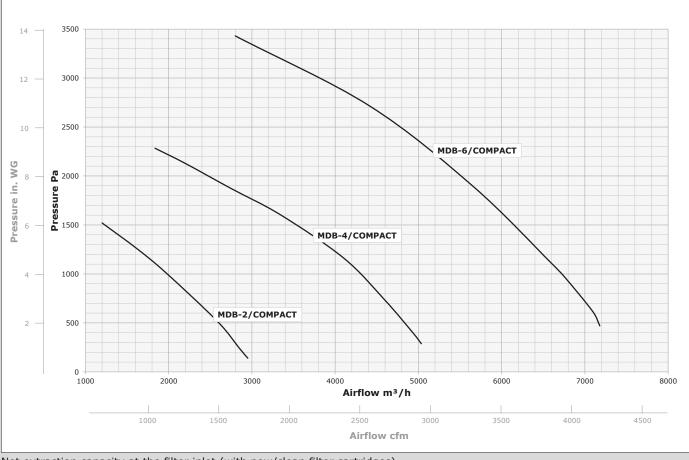

Small footprint due to compact design.

PERFORMANCE CHART (60Hz)

Net extraction capacity at the filter inlet (with new/clean filter cartridges)

Application restrictions

Do **not** use the product for the following applications or in the following circumstances: polishing applications in combination with grinding, welding or any other application that generate sparks (fibres from polishing or abrasive flap disks are highly flammable and pose a high risk of filter fires when exposed sparks) | aluminium laser cutting | arc-air gouging | extraction of aggressive fumes and gases (e.g. from acids, from alkaline, from soldering paste containing lithium) | extraction of hot gases (more than 70°C/158°F continuously) | grinding aluminum and magnesium | flame spraying | extraction of cement, saw dust, wood dust etc. | sucking cigarettes, cigars, oiled tissues and other burning particles, objects and acids | explosive environments or explosive substances/ gases
